AGAZONE
(27.6% W/V Paraquat)
This formulation contains an emetic stenching agent and dye.

- AGAZONE is available in 1, 4 and 20 litres.
- AGAZONE is a non selective weedicide.
- AGAZONE kills all green plant tissue on contact.
- AGAZONE is used for weed control in crops and also industrial sites.
- AGAZONE can be mixed with Karmex DF, Diuron DF, Velpar K4, and Nutrazine to get rapid knockdown and prolong weed control around industrial sites.
- AGAZONE can be mixed with a non ionic surfactant like X - 77 Sticker or Input Penetrant to enhance its performance.
